Specifications

Designed to keep prepared food fresh and hot

Food warmers and holding stations are optional accessories that may be added when purchasing a spreader cabinet. Use these items to maintain optimal temperature of prepared food. Food warmers are available separately to fit existing Dean holding stations.

The rectangular food warmer produces an 18" (45.7 cm) heat pattern over the entire length of the unit to keep cooked food at optimal temperature with radiant heat to assure peak flavor without cooking or drying. The shell is manufactured

with durable aluminum alloys and is easy to clean. "ON/OFF" toggle switch and a 6' (1.8 M) cord set are mounted in the shell. Mounting brackets and hardware are provided for installation.

These units are NSF, UL and CUL approved and can be used with either the cafeteria-style pan with mesh screen or with the perforated, curved scoop pan for quick, easy bagging.

*Dean food warmers and holding stations are designed to fit the Dean spreader cabinet; they are not free standing accessories.
